Evidence of being a local resident

WHAT IS DFES DOING?

- Emergency services personnel are assessing damage to more than 875 buildings caused by Ex Tropical Cyclone Seroja.
State Emergency Service (SES) Volunteers from across the state are assisting with operations and responding as requested.
The Incident Management Team are actively working with local DFES personnel to ensure the safety of the community.
Rapid Damage Assessment Teams have completed over 1750 assessments so far, 300 more than initial expectations.
DFES has 500 personnel in the Midwest Gascoyne Region assisting with recovery efforts.
Storm damage teams have arrived from New South Wales, South Australia and Victoria to help, along with Australian Defence Force personnel.
DFES will continue to hold community meetings.

COMMUNITY IMPACT

Number of Properties Impacted

Residential and business damage numbers across the Midwest Gascoyne:

- 57 totally damaged or destroyed
234 severely damaged
253 moderately damaged
530 slightly damaged

Asbestos

Information from Department of Health (DoH) is that the risk of airborne asbestos fibres in affected areas remains 'low' and that P2 respirators are not required unless handling asbestos or in close proximity to personnel undertaking asbestos clean-up.

- Contact your Local Government and/or insurer for advice on managing asbestos on your property.
DFES is undertaking work to stabilise material containing asbestos in the highest impacted towns of Kalbarri and Northampton, this work will continue into other affected areas.
Bonding agent is being sprayed to stabilise material containing asbestos. This bonding agent is tinted with paint or dye for visibility and it is non-toxic.
There will likely be some restrictions of movement with road closures, this is unavoidable, and we ask for the community's understanding.

As a cautious approach don't use blower vacs when cleaning yards as it may disturb products that may contain asbestos and check garden refuse for asbestos or other material before mulching.

KEY SAFETY MESSAGES

- Do not approach fallen power poles or power lines
Avoid physically touching or handling asbestos or any material that may be asbestos
Avoid driving or entering flood or stagnant water
Run household taps to clear before using
Seek support for any emotional and psychological stress and trauma
If perishable food has not been refrigerated it can cause food poisoning
Ensure your pets are safe and supported
Seek medical attention if you or a family member are unwell
In a life-threatening situation call 000
Support vulnerable people in your local community
Stay connected with your friends, family and community members
